

FRUIT 'n NUTS 2017

Our chosen varieties are selected for their history of producing well and maintaining high health. Most of our young fruit trees have been grown in our open-ground nursery using natural methods, where there is no use of chemical pesticides or artificial fertilisers. Some plants are bought in from other nurseries and we do not have details of their growing practices. Potted plants (in PBs) have slow release pellet fertiliser in their mix.

Please specify if you prefer only organically grown plants.

NOTE	CODE
OG (bare rooted) plants are available in winter from July through to late August only. They can be ordered any time.	med medium sized fruit.
PB & RT stock available most of the year, ie Chilean guavas, edible Holm oaks, feijoas, lemons, olives, pinenuts and pomegranates.	mid fruits in middle of fruiting season for that plant.
Other new season plants become ready from October through to April depending on variety.	OG grown in open ground, bare rooted.
	PB grown in plastic planter bag.
	POL pollinator for that variety.
	PVR protected from duplication by Plant Variety Rights & incurs a royalty fee.
	RT grown in root trainers.
	SF self fertilising.
	S/O sold out for this season.

APPLES OG (sold bare-rooted mid June to August) PRICED ACCORDING TO GRADE \$28
Grades according to availability Potted, additional cost from \$3.50 extra according to pot size

Our apple stocks are 1 and 2 year olds from 75cm to 1.7m+ tall and are available in varying numbers so order early to get the variety you prefer. All apples are sold bare-rooted unless requested otherwise. Potted price as above. Apples need another apple as a pollinator and this can be over about 30 metres, or 100 feet. Any neighbourhood tree will do the trick. Apples fruit within 3 to 6 years or less.

ROOTSTOCKS

MM27 - Dwarf rootstock, virus resistant, ideal for home gardens, early bearers growing 2 to 3m tall
Em9 & MM102 (larger) - Dwarf rootstocks, virus resistant, ideal for home gardens, early bearers growing 2 to 3m tall
MM106 - Semi-dwarf rootstock produces a medium sized tree 3 to 4m (+ in Taranaki) with a short time until bearing. Ideal for home gardens and suitable for cordons and espalier. Resistant to woolly aphid.
Most apples are on the MM106. Rootstocks for specific varieties are available as listed while stocks last.

VARIETY	CHARACTERISTICS	ROOTSTOCK
Ballarat	Large green red blush, white flesh, vigorous, abundant, late, cooker, stores well, healthy.	106
Braeburn	Medium, mid season, red striped over green, tangy flavour, dessert, good cooker.	MM27 106

CRABAPPLE Malus Jack Humm (Grafted) 1.7m+ \$28
Rounded tree,holds glossy red fruit well winter, single white flower, 4m.

APRICOT These varieties have low chilling requirements. Suitable for North Island on Peach stock. \$28
Fitzroy From New Plymouth, med, late, golden, heavy cropper, self fertile.
Hawera Heavy cropper, selected from successful seedling in Hawera, self fertile.

BLUEBERRIES (Specific types) Prefer average to acid moist soils, organic leaf matter and winter chill, PB5 \$14.50
cross pollination assists good crops, can be grown as a hedgerow.
To ensure the best flavour leave fruit on bush for 7-10 days after turning blue.

Northern High bush (NE USA)

Prefer cooler southern NZ districts, earliest to ripen - mid Nov to Feb, upright, deciduous, self pollinator although larger berries when planted with other Highbush varieties up to 6m.

Atlantic	N.Highbush	Mid season, heavy producer, medium sized firm aromatic fruit, spreading habit.
Burlington	N.Highbush	Late small-medium light blue fruit.
Dixi	N.Highbush	Vigorous spreading, late, large aromatic fruit.

Rabbiteye (SE USA)

Warmer districts, evergreen, upright, more vigorous, higher yields, mid Jan to mid April, needs pollinator, 3m x 2m.

Blue Dawn	Rabbiteye	Large tasty fruit ripens over summer, pink tinged cream flowers spring.
Centurion	Rabbiteye	Dark firm fruit, late flowering, warmer climate ie Waikato north. POL Tif Blue
Tasty Blue	Rabbiteye	Large delicious fruit.
Tif Blue	Rabbiteye	Large fruit, vigorous, cold hardy. POL other rabbiteye varieties

Southern Highbush (Sthn USA)

Waikato north as frosts may damage early flowers, hybridised for low chill, heat tolerance & soil adaptability, self pollinator although larger berries when planted with other Sthn Highbush varieties, 2m.

Misty Southern Highbush May fruiting, large berries, evergreen, high yield, for northern districts

BOYSENBERRIES Vigorous, prolific cropper, ripe in December PB5 \$14.50

CHERRIES Grafted on to semi-dwarf rootstock. 1m – 1.7m. Grades according to availability OG \$20 - \$28
Compact Stella Compact tree, dark skinned fruit late Dec /Jan, self fertile.
Tangshe Pale pink fruit late Oct /Nov with pink blossom, self fertile.
Lapins Large firm dark red sweet late, self fertile.

CHILEAN GUAVA (Myrtus ugni) "Tazzie Berry"

Sometimes called the NZ cranberry. Small evergreen shrub with round fragrant red berry-like fruit, about 10mm in diameter with a sharp pleasant flavour. Eat off the bush or use in pies, jellies & sauces. YUMMY!
 Attractive clipped hedge. Easy care and produces large crops. Uncut height to 1.5m PB3 \$5.00 or 5 for \$22.50

CRANBERRY Fruit on upright stems April, sweeten with first frosts, store well, up to 5 months. Health properties.
Bergman / Self fertile, low trailing ground cover or curtain forming plants, green leaves turn purple winter,
Crowley \ evergreen, runners up to 2m length. Bergman has lower chill requirement than Crowley.
 1 Litre pot \$5

CURRANTS BLACK Deep acid moist soil, sun or semi shade, fruiting on new wood after pruning,
Goliath Vigorous, large berries, 1.5m. OG \$4.50 or 5 for \$20
Magnus Large berries, Dec – Jan, 1.8m.
CURRANT RED Gloria de Versailles Fruits on older wood, large red berries, vigorous, Dec - Jan, 2m.
Mangatoki Vigorous, prolific, small berries, December.

ELDERBERRIES Champagne varieties Adams & Nova, healthy and vigorous. Flower Dec - Jan, 3m. OG \$6

FEIJOA Up to 3 years to bear fruit, ornamental red pohutukawa-like flowers, sunny site.
Apollo Self fertile, mid to late, med/large good quality fruit, slow growing, sun or shade, 2-3m. \$17
Mammoth Earlier fruiting, requires cross pollination with Triumph, 1.8m. PB5 \$17 or 5 for \$80
Sellowiana **Seedling plants** - Ideal for a hedge row crop, 3m. PB3 \$5 or 10 for \$45
Triumph Later fruiting, requires cross pollination with Mammoth, 1.8m. PB5 \$17 or 5 for \$80
Unique Self fertile with large fruit, good crops from young plant, 2m+. PB6.5 \$17 or 5 for \$80

FIGS Ficus carica OG 1yr old \$6 OG Large grades 7.50
 The Brown Turkey figs have heavy crops, brown fruit, large spreading tree, good for drying & jam, hardy, 5m.

Lebanon (Brown Turkey type) Late season, green skin, unattractive to birds.
Striped Fig (Brown Turkey type) Amber, heavy cropper.
French Sugar (Brown Turkey type) Good cropper, large, green/red skin, red sweet flesh, ripens March.
 Pick & leave 2-3days to soften, keep well in fridge.
Ventura Compact, suitable for containers, good flavour, bears young, frost tender, 1.5m.

GRAPES PB6.5 \$14.50
Albany Surprise Bluish black juicy aromatic table grape, hardy.
Niagara Green gold, v sweet, juicy, tangy, thin skin, lg clusters March, low seed content, healthy, vigorous.

LEMON MEYER Med sized juicy fruit, mild flavour, ripe most of year, cutting grown, 2m. PB12 \$14
LEMONADE Sweeter and less acidic, easy-peel with segments, cutting grown, 2m+ \$8.50
KUSAIE LIME Yellow, aromatic, easy peel, mildly acidic, 2m. \$8.50

MULBERRY BUSH Traditional silk-worm habitat
Morus Alba (White mulberry) Light green Chinese tree, white ripening to pink edible fruit late spring,
 loved by birds, 10-15m. OG 2m \$10
Morus Nigra (Black Mulberry) Edible deep red sweet aromatic fruits, old oriental tree, dark green leaves,
 broadly spreading deciduous, 5-8m. OG 1.8m \$10 PB8 13.50

NECTARINE Self fertile. Small numbers of other varieties may also be available. OG 1.2 - 2.0m \$20 - \$28
Cole White flesh, mid, leafcurl resistant.
Makuri Red/ green flesh, green/ red skin, early mid, leafcurl resistant.
Manaia White/ green flesh, sweet, healthy, mid.

OLIVES (Olea Europaea) Evergreen hedge & fruiting plants hardy to most soil types & wind, PB5 \$6.50 / 5 for \$32
J5 Heavy crop, good size, commercial variety, oil & pickling, frost tolerant, 3m.
Koronenki Early, Crete's main variety, spicy oil content up to 24%, pickling, large crop of small green fruit,
 needs to cross pollinate with other variety, 3m.
Leccino Tuscany, vigorous, healthy, early, prolific, quality dark green fruit, produces 17% oil,
 most frost tolerant variety once established, needs other variety to fruit, 2.5m.
Rakino Prolific producer, ideal for coastal conditions, flavoursome fruit, preserves well, 3m.
Verdale Lge fruit ideal for pickling, 10% oil, very frost tolerant, compact, suits container, 4m.

PEACHES Selected for leaf curl resistance, on Golden Queen rootstock. Self-fertile. OG 1.2 – 1.8m \$20 – \$28
 The names used for some of these varieties often simply refer to the area where the scion material was collected.
 These older survivor trees are recommended by their owners as disease resistant, and have shown good health in our South Taranaki nursery. All peaches are grown in the open ground (OG).

Aotuhia	Medium large, mid, gold/ red, yellow flesh, freestone, delicious, from East Taranaki.
Blackboy	Medium, late, purple flesh/ skin.
Golden Queen	Medium, late, large golden yellow flesh & skin, clingstone, heavy cropper, best bottler.
Urenui Gold	Medium, mid, green/gold skin, red blush, gold flesh, healthy.
Wai'iti	Medium, mid, red/ green skin, white flesh, freestone, prolific, from North Taranaki.

PEARS Pears are only partially self-fertile and produce better when grown with a suitable pollinator. OG \$28
 Can take up to 8 years to bear fruit. Size 1.2 – 1.8m.

Rootstocks:	Quince = Semi-dwarf with interstock (2 - 3m)	QuA. = Semi-dwarf	QuC. = Dwarf
	Quince BA29 = 80% the size of Quince seedling; more drought tolerant		
Beurre Bosc	Late large yellow/russet, dessert, 1st rate, keeps, needs warm spot. POL: W.Nelis		QuC.
Conference	Medium, mid, deep green/russeted, long necked, dessert, self fertile.		QuA. QuC.
Doyenne du Commice	Med, mid season, gold russet, poor keeper, juicy, good flavour. POL: W.Nelis.		BA29
Packham's Triumph	Large, mid, green/yellow skin, good keeper. POL: WBC, W.Nelis, Beurre Bosc.		QuA.
Taylor's Gold	Gold russet skin, sweet melting flesh.		QuC.
William Bon Chretien	Lge sweet, green/yellow, dessert,bottler. POL:W.Nelis, B.Bosc,Conference, DDC.		QuC.
Winter Nelis	Small, medium green/russet, dessert, heavy cropper, late, stores well.		BA29. QuC.
	POL: William Bon Chretien, Beurre Bosc, Conference, Packhams Triumph		

PERSIMMON Seedlings Lovely spreading ornamental, astringent fruits, striking autumn foliage, 6m+ OG 2m \$9.50

PLUMS OG 1.2 - 2m+ \$20 - \$28

Plums need a pollinator except for self-fertile varieties which will fruit better with company.
 Heavier soils suit plum rootstocks.

CODE: POL= pollinator. **Rootstocks:** **P**= Golden Queen Peach, **MA**= Mariana Plum, **MY**= Myrobalan plum.
 Early is late Dec. to Jan, Mid is mid Jan to mid Feb, Late is mid Feb onwards.
